Conference Schedule

Workers' inquiry is an approach to and practice of knowledge production that seeks to understand the changing composition of labor and its potential for revolutionary social transformation. It is the practice of turning the tools of the social sciences into weapons of class struggle. Workers' inquiry seeks to map the continuing imposition of the class relation, not as a disinterested investigation, but rather to deepen and intensify social and political antagonisms.

This conference brings together various aspects of workers' inquiry, from its historical origins and development to contemporary mutations and adaptations of it within contemporary struggles. It will expand the terrain and form of workers' inquiry, focusing on topics including inquiries into cultural labor and the service economy, geographies of class conflict, transformation in value production, and the limits to workers' inquiry as a political/research method.

Day One: Thursday May 2nd, 2013 @ Room 4N2.3
